

LPS II 3000 with capacity extension 260 Ah

Set for expanding the capacity of an LPS II 3000 including 100 Ah battery, charge booster and installation set. With a total capacity of 26 Ah, the set is suitable for demanding applications that require a long-lasting power supply.

// Controlled charging/discharging
// Extendable, even at a later date
// Any battery can be used (12/24 V + different capacity)

By integrating an additional lithium battery, the voltage remains stable while the capacity increases to 440 Ah. This ensures an extended and reliable power supply for a wide range of devices and consumers.
A special CLP 600 charge booster regulates the charge of the additional battery and ensures balanced capacity equalisation. The programming of the LPS II specially developed for this extension guarantees seamless integration and optimum performance.
Installation is simple and user-friendly thanks to the connection kit specially developed for the capacity expansion.
The set consists of:
LPS II 3000
CLP 600 charge booster
100 Ah battery
LPS II connection kit
LPS II Pro mounting plate
LPS II remote control

Technical Information

Total capacity	260 Ah (3,580 Wh)*
Capacity LPS II	160 Ah (2,048 Wh)
Capacity auxiliary battery	100 Ah (1,280 Wh)
